PROJECTS

JARVIS DESKTOP VOICE ASSISTANT

Built as a desktop voice assistant using **Python**.

- Jarvis assists with information retrieval, music playback, time and weather updates, Google searches, screenshot capture, news reading, note-taking.
- It has a basic UI which makes Jarvis more interactive with the user, made with QT Designer.

CAR PARKING SYSTEM

The Parking System is built in **Java**.

- It is simple console-based application that allows users to park their cars, removed their cars and view all parked cars.

CERTIFICATE

- @ The Complete 2023 Web Development Bootcamp by Dr. Angila Yu!
- @ JavaScript Essentials 1 (JSE) course by Cisco Networking Academy
- @ AWS Academy Cloud Foundations
